

Job Title: Full Stack Developer (.NET + Angular / React)

Location: [Your Location / Remote / Hybrid]

Experience: 3–6 Years

Job Summary:

We are seeking a Full Stack Developer with experience in .NET and Angular or React to help build and scale our ERP/HRMS platform. The candidate will work across both backend and frontend layers, contributing to development, optimization, and system design.

Key Responsibilities:

- Design, develop, and maintain web applications using .NET and Angular or React
- Build RESTful APIs using ASP.NET Core
- Develop scalable and maintainable frontend applications
- Collaborate with UI/UX designers and QA engineers
- Optimize application performance and scalability
- Write clean, maintainable, and testable code
- Participate in code reviews and technical discussions

Required Skills:

- Strong experience with ASP.NET Core / .NET Core
- Experience with Angular or React
- Proficiency in C#, JavaScript, and TypeScript
- Experience with REST API development and integration
- Good understanding of relational databases (SQL Server / MySQL)
- Familiarity with Entity Framework Core or similar ORM
- Experience with Git-based version control

Preferred Skills:

- Knowledge of clean architecture or layered architecture
- Experience with authentication (JWT, OAuth)
- Familiarity with cloud platforms (Azure preferred)

- Experience with Docker or containerization
- Understanding of CI/CD pipelines

Soft Skills:

- Strong problem-solving abilities
- Good communication skills
- Ability to work independently and in a team

Nice to Have:

- Experience in ERP/HRMS systems
 - Experience in migrating legacy systems
-
