

PRAKASH S

Senior .NET Developer with 5 years of experience in designing and developing scalable web applications using ASP.NET Core, Web API, SQL Server, Blazor, and Azure Cloud. Expertise in building high-performance REST APIs, optimizing database performance, and implementing enterprise-grade billing and workflow systems. Strong experience in microservices architecture, CI/CD pipelines, and production support.

🐙 PrakashSini

TECHNICAL SKILLS

Backend & Frameworks: ASP.NET Core, Web API, C#, Microservices, Hangfire.

Databases & ORM: SQL Server, MySQL, LINQ, Entity Framework, ADO.NET.

Stored Procedures, Query Optimization

Frontend: Angular, Asp.net Mvc, Blazor, JavaScript, HTML, CSS

Cloud: Azure (App Service, Functions, Blob Storage, SQL Database)

DevOps: Azure DevOps, Jenkins, Docker, Kubernetes, Git

AI & Automation: Azure OpenAI Service, AI API Integration, Prompt Engineering, Intelligent Automation Workflows.

WORK EXPERIENCE

Byetflow Innovations Pvt Ltd

Senior Developer

Sep 2025 - Present

- Designed and optimized complex SQL Server queries and stored procedures, improving data retrieval performance by ~30%
- Developed and maintained microservices-based architecture using ASP.NET Core Web API for scalable deployments
- Resolved critical production issues and improved system stability through proactive monitoring and optimization
- Collaborated with cross-functional teams to enforce coding standards and improve code quality

Technologies: .NET Core, Web API, SQL Server, Microservices, Xamarin

Knowledge Flex Technology

Software Developer

Oct 2023 - June 2025

- Built and maintained full-stack applications using ASP.NET Core, Blazor, and SQL Server
- Developed reusable UI components and optimized backend APIs for better performance
- Improved application performance and reduced bug count through efficient debugging and refactoring
- Contributed to end-to-end SDLC including development, testing, and deployment

Technologies: .NET Core, C#, Web API, SQL Server, Blazor

Turning Point Software Solution

Software Engineer - 1

Dec 2021 - Jan 2023

- Developed REST APIs and frontend features using ASP.NET Web API and Angular
- Implemented business logic and optimized SQL queries for reporting systems
- Collaborated with team members to deliver scalable and maintainable solutions

Technologies: .Net, Asp.net MVC, Web Api, C#, MySQL, Angular

Vikas Global Solutions

Junior Software developer

Sep 2020 - Nov 2021

- Assisted in development of web modules and bug fixes using ASP.NET Core and Angular
- Supported senior developers in delivering project requirements on time

Technologies: ASP.NET Core, Asp.Net MVC, Web API, C#, SQL, Angular

EDUCATION

SEA College of Engineering and Technology Bangalore

Bachelor of Engineering (ME) - 7.7 CGPA

July 2016 - May 2019

Palle Technologies

Full Stack Dot net developer

PROJECTS

AMS & SVU

- Developed examination modules for exam application, subject selection, semester scheduling, and payment workflows.
- Built reports and dashboards to track exam applications, payment status, and student details.
- Handled bug fixes, enhancements, and performance improvements.
- Developed a mobile-based Apartment Management System to manage residents, complaints, maintenance, and billing workflows.
- Implemented AI-powered complaint classification using Azure OpenAI Service to automatically categorize resident issues
- Developed AI-based response suggestion feature to assist admins in resolving complaints efficiently
- Designed intelligent workflows for maintenance tracking, complaint handling, and notifications

Clients Contract Billing (CCB) System

- Developed scalable REST APIs for contract management, invoice scheduling, and reporting
- Designed and optimized SQL queries and database schemas for high-volume data processing
- Built dynamic Blazor UI components for dashboards and workflows
- Implemented multi-stage approval workflows and complex billing logic
- Integrated Excel-based bulk data upload with validations

Enterprise Workflow & Approval Management System

- Designed and developed an enterprise-grade workflow management system using ASP.NET Core Web API and Angular to automate business approval processes
- Implemented configurable multi-level approval workflows, role-based access control, and dynamic rule engines similar to large-scale enterprise applications
- Developed RESTful APIs to handle workflow creation, approval routing, escalation, and audit tracking
- Optimized SQL Server database with indexing and query tuning to support high-volume transactional data
- Built dashboards for real-time tracking of workflow status, approvals, bottlenecks, and SLA metrics
- Integrated email notifications and logging mechanisms for complete workflow traceability

Ticket Management System

- Designed and developed system using ASP.NET Core Web API and Angular
- Implemented role-based workflows and ticket lifecycle management
- Integrated Azure OpenAI Service to auto-classify tickets and suggest resolution responses
- Built AI-powered smart search and summarization for faster ticket analysis
- Implemented prompt-based automation to generate responses and reduce manual effort
- Integrated email notifications and Azure Blob Storage for attachments

CERTIFICATE

NASSCOM Certified Full-Stack .NET Developer
